## Business Employment Dynamics in Utah – Third Quarter 2014

From June 2014 to September 2014, gross job gains in private sector establishments in Utah totaled 76,505, while gross job losses numbered 65,137, the U.S. Bureau of Labor Statistics reported today. Gross job gains exceeded gross job losses by 11,368. Regional Commissioner Stanley W. Suchman noted that gross jobs gains exceeded gross job losses by 5,400 during the previous quarter.

**Chart 1. Private sector gross job gains and losses in Utah, September 2009–September 2014 by quarter, seasonally adjusted**

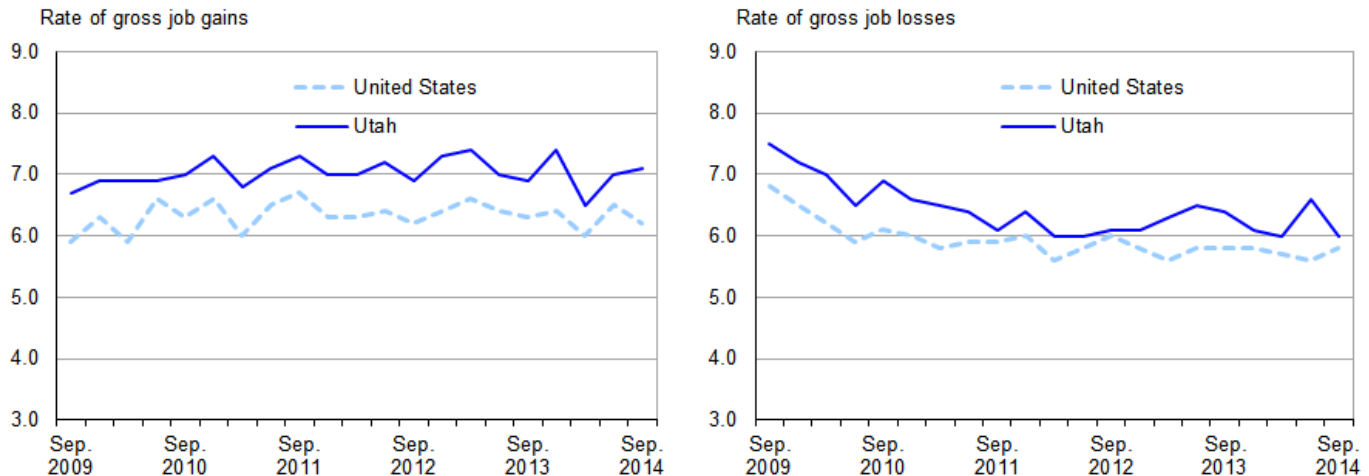

Source: U.S. Bureau of Labor Statistics.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. Business Employment Dynamics (BED) statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments

and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross job gains and the number of gross job losses is the net change in employment. (See the Technical Note for more information.)

Utah's gross job gains have been above 70,000 in 8 of the last 10 quarters. Gross job gains reached a series high in March 2006 when Utah gained 84,747 jobs. Gross job losses declined by 5,009 in the three months ended in September 2014 after increasing in the previous quarter. (See [chart 1.](#)) Gross job losses peaked in March 2009, when 86,448 jobs were lost within a three month period.

**Chart 2. Private sector gross job gains and losses as a percent of employment, United States and Utah, September 2009–September 2014 by quarter, seasonally adjusted**

Source: U.S. Bureau of Labor Statistics.

Gross job gains represented 7.1 percent of private sector employment in Utah in the quarter ended September 2014, while nationally gross job gains accounted for 6.2 percent of private sector employment. (See [chart 2.](#)) The rate of gross job gains in Utah has been above the U.S. rate since 1992 when data were first published. The rate of gross job losses in Utah has matched or exceeded the U.S. rate each quarter since December 1995.

During the third quarter 2014, gross job gains exceeded gross job losses in 10 of the 11 industry sectors in Utah. For example, within professional and business services, gross job gains exceeded gross job losses by 3,127. While 15,742 jobs in the industry were created by opening and expanding establishments, 12,615 jobs were lost in closing and contracting establishments in the three months ended in September 2014. In education and health services, 8,339 jobs were created in opening and expanding establishments and 6,168 jobs were lost in closing and contracting establishments. (See [table 1.](#))

In contrast, gross job losses exceeded gross job gains in the transportation and warehousing sector during the third quarter of 2014. The 2,372 jobs lost in contracting and closing establishments offset the 2,304 jobs created in expanding and opening establishments, resulting in a net loss of 68 jobs.

### For More Information

BED data for the states have been included in [table 2](#) of this release. For more information on the Business Employment Dynamics data, visit the BED web site at [www.bls.gov/bdm/](http://www.bls.gov/bdm/).

---

**The Business Employment Dynamics for Fourth Quarter 2014 are scheduled to be released on Wednesday, July 29, 2015 at 10:00 a.m. (EDT).**

### **Technical Note**

The Business Employment Dynamics (BED) data are a product of a federal-state cooperative program known as Quarterly Census of Employment and Wages (QCEW), or the ES-202 program. The BED data are compiled from existing quarterly QCEW records. The QCEW reports are sent by the State Employment Security Agencies (SESAs) to BLS and form the basis of the Bureau's QCEW program and establishment universe sampling frame. These reports are also used to produce the QCEW data on total employment and wages. Other important Bureau uses of the QCEW reports are in the Current Employment Statistics (CES) program. The CES program produces monthly estimates of employment, net changes, and earnings by detailed industry.

In the BED program, the QCEW records are linked across quarters to provide a longitudinal history for each establishment. The linkage process allows the tracking of net employment changes at the establishment level, which in turn allows the estimation of jobs gained at opening and expanding establishments and jobs lost at closing and contracting establishments.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. BED statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross jobs gained and the number of gross jobs lost is the net change in employment.

Gross job gains and gross job losses are expressed as rates by dividing their levels by the average of employment in the current and previous quarters. The rates are calculated for the components of gross job gains and gross job losses and then summed to form their respective totals. These rates can be added and subtracted just as their levels can. For instance, the difference between the gross job gains rate and the gross job losses rate is the net growth rate.

The formal definitions of employment changes are as follows:

*Openings.* These are either establishments with positive third month employment for the first time in the current quarter, with no links to the prior quarter, or with positive third month employment in the current quarter following zero employment in the previous quarter.

*Expansions.* These are establishments with positive employment in the third month in both the previous and current quarters, with a net increase in employment over this period.

*Closings.* These are either establishments with positive third month employment in the previous quarter, with no employment or zero employment reported in the current quarter.

*Contractions.* These are establishments with positive employment in the third month in both the previous and current quarters, with a net decrease in employment over this period.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; Federal Relay Service: 800-877-8339.
